DOCUMENT-IDENTIFIER: EP 1164768 A2

TITLE: Third-party authorization for home-based printing

Abstract Text (1):

CHG DATE=20020103 STATUS=N> Authorized transmission of print data from an Internet application to a home access device having a printer connected thereto, the printer being serviced by a remote print server which controls data transmission to the home access device, in which authorization is obtained from an intermediary service for the Internet application to transmit the print data to the home access device via the remote print server, and in which the authorized print data is transmitted to the home access device via the remote print server for printing on the printer.

## BASIC-ABSTRACT:

NOVELTY - System comprises submitting device (20), means for converting the encrypted data into an intermediate data protocol format, peripheral device (printer) (70), means for converting the data to a format recognised by the peripheral (peripheral device driver) and means (IR/RF transceiver) for wirelessly communicating between the submitting and peripheral devices.

DETAILED DESCRIPTION - There are INDEPENDENT CLAIMS for:

- (1) A printing system
- (2) A method of printing data from a user submitting device

USE - System is a print server for adding secure, accountable and wireless printing capabilities to printer devices and enables printing from a laptop, palm organiser, PDA, cellphone, two-way text pager etc. Revenue can be collected from use of printers in e.g. kiosks, libraries, malls etc.

ADVANTAGE - System adds security and accountability to a wireless-enabled printer.

DESCRIPTION OF DRAWING(S) - The figure shows a block diagram of a wireless printing system

submitting device 20

printer 70
